WHAT CAN YOU STUDY HERE?

Our seven accredited faculties are offering a large variety of Bachelor and Master programs, taught in Romanian. Erasmus students will receive materials/ course notes / tutorials in English. Also, Erasmus students will have the opportunity to choose courses from any year they want, provided they belong to that semester.

BACHELOR PROGRAMS

Faculty of Economics

*Accounting and Administration Informatics (3 years) * Economics and International Business (3 years) * Finances and Banks (3 years) * Management (3 years) * Service and Tourism Commerce Economy (3 years)

Faculty of Exact and Engineering Sciences

*Automatics and Applied Informatics (4 years) * Informatics (3 years)* Physics (3 years) *

Faculty of Psychology and Educational Sciences

*Psychology (3 years)

Faculty of Journalism

*Journalism (3 years)

Faculty of Arts

* Performing Arts (Acting) (3 years) * Cinematography, Photography and Media (Movie and TV Directing) (3 years)

Faculty of Social, Humanistic and Natural Sciences

*Political Sciences (3 years) * History (3 years) * Geography (3 years) * Letters and Foreign Languages (3 years)

Faculty of Legal Sciences

*Law (4 years)

MASTER PROGRAMS

Faculty of Economics

*Financial-Accounting Audit and Advice (2 years) * Leadership and Consultancy In Commercial International Business (2 years) * Leadership and The Management of Human Resources (LMRU) (2 years)

Faculty of Exact and Engineering Sciences

*Technical and Technological Projects Management (2 years) * Physics of Materials and Applications (2 years)

Faculty of Psychology and Educational Sciences

*Clinical Psychology and Psychological Counselling (2 years)

Faculty of Journalism

*Media Communication and Advertising (2 years)

Faculty of Arts

*Acting. Renewing Means of Artistic Expression (2 years)

Faculty of Social, Humanistic and Natural Sciences

*Geopolitics, History and International Relations (2 years) * Cultural Diplomacy (2 years) * Environmental Management and Sustainable Development (2 years) * Intercultural Communications and Professional Translations (2 years)

Faculty of Legal Sciences

*Business Criminal Law (2 years)

WHY SHOULD YOU STUDY HERE?

***Location, premises, technical equipment, local partnerships**

Located in the heart of the city (Calea Calarasilor 169, Sector 3), the University's **modern building** is **fully equipped** for today's challenges on the labor market and a wonderful place for scientific life. The up-to-date didactic and high-tech research laboratories, the newsroom for the online school newspaper *Hyperflash* (edited by the Faculty of Journalism), the Press Office, the HD and ultra HD TV studios and the Radio Studios attract approximately 1000 students a year. Due to its own television channel – HYPTV - where students can apply their knowledge, producing video materials to promote the most important cultural and scientific university events, the University also works in partnership with the Cotroceni Museum, the Village Museum, the Museum of Literature, the Museum of History, with cultural institutes (the Romanian Cultural Institute – ICR, the Instituto Cervantes, the Italian Institute, the French Institute, the Polish Institute), the Institute of Psychology, the National Military Circle, the Royal House

of Romania, theaters (Masca, Metropolis, the Jewish State Theatre, Notara, etc), with multinational companies, with the Bucharest Townhall, the Sector 3 Townhall, the AMPT (Administration of Monuments and the Touristic Patrimony), the National Library, televisions, publishing houses, etc. While the Conference Room, which allows for live broadcasting, online streaming, makes Hyperion University a valuable host for national and international events. As of this autumn, students will enjoy a **modern, renovated hostel**, situated in Vitan, Bulevardul Energeticienilor 9-11, Sector 3, Bucharest, connected to public transport and close to the famous Bucharest Mall (the first mall in Romania) and to Auchan Vitan. Since most of our students and Romanian young people in general speak English, you will have no difficulty in making lots of friends here, and fully enjoy life in Bucharest.

***Learning outcomes**

****Faculty of Economics**

*****Accounting and Administration Informatics**

*identify the effective accounting documents as sources of accounting registry * classify enterprises as accounting organization units * identify and describe patrimonial elements * group together patrimonial elements in structures of assets and liabilities * Assess the patrimonial elements * Describe accounting specific procedures * Identify accounting principles * Explain the structure of balance, of balance equilibrium, of the types of balance changes * Acknowledge the economic means and sources * Identify the elements of the account and describe the functioning rules of the accounts * Establish the correspondence of accounts based on account analysis * Record economic-financial operations using account analysis * Identify similarities and differences between balance and account * Use the accounts plan

*****Economics and International Business**

- in-depth knowledge of international market research methods * understand international marketing strategies and policies * learn both the opportunities and the risks of international business and the main economic theories
- be able to negotiate, contract and conduct business internationally * be able to apply international usage in business, to correlate similar knowledge acquired during faculty, to prepare international business specific documents, to identify and use new information sources necessary to solve new problems and the ability to apply acquired knowledge creatively, in various professional situations
- be able to coordinate and communicate efficiently with the members of a team in at least 2 foreign languages and to adapt oneself to team-work conditions

***** Finances and Banks**

*the ability to apply the fundamental concepts, theories and methods of investigation from banking and finance * develop the ability to synthesize and interpret financial specific information, solve basic problems and assess possible conclusions * the ability to analyze specific problems independently and to communicate and demonstrate the solutions chosen * the ability to assess complex accounting problems and to communicate the results of your own assessment eloquently * take initiative when

analyzing and solving financial and banking problems * use the computer for specific assignments in Finances and Banking * process and manage financial and banking information * perform operations specific to financial and banking institutions, to the stock exchanges and other financial institutions * coordinate a team performing financial and banking control activities * be part, as a team, in designing and carrying out financial and banking specific programs * the ability to use the statistical-mathematic tools

*** Management

- the knowledge, understanding and use of the concepts, theories, principles and fundamental investigation and prospecting methods specific to economy * explain and interpret ideas, processes, phenomena, states and tendencies specific to micro- and macroeconomic activities in contexts specific to a knowledge-based society * gather, analyze and interpret qualitative and quantitative data and information concerning a certain problem * analyze states and situations and assume the responsibility of solving problems, of communicating and demonstrating the results of your own activity * the ability to work independently or in a team to solve problems in certain professional contexts * use modern software technology to prepare papers, to process information and to access databases specific to the activity from various organizational structures * professional verbal and written communication in at least one language of international circulation
- the knowledge, understanding and contextual use of the managerial concepts specific to competitive economy * assess, interpret and explain the phenomena and tendencies noticed in organization development through an integrating perspective * the efficient application of managerial methods, tools and techniques to specific socio-economic realities and to the behavioral type of the company in areas specific to sells, acquisition, the research and development, manufacturing process coordination, human resources * use your knowledge and abilities in the benefit of the organization to minimize risks and to capitalize on the advantages of the competitive environment

***Service and Tourism Commerce Economy

*commerce, tourism and services information processing and preliminary analysis meant to ground managerial decisions * knowledge of service activities specificities * the ability to use commerce, tourism and services implementation methods and techniques efficiently * participate in the elaboration of prefeasibility and feasibility studies of business investment in commerce, tourism and services and efficient implementation plans, programs and procedures * the ability to understand, interpret and capitalize on commerce, tourism and services circumstantial tendencies through concrete propositions * the ability to communicate the results of your own evaluation demonstratively * the ability to understand and defend the interests of the activity you represent when interacting with business people, clients and other stakeholders directly or indirectly involved in business * activities related to the organization of commerce, tourism and services fairs and exhibitions * the ability to deal with a client in your capacity of travel agent: the interface between the agency and the client (offer information, prepare primary documentation, touristic assistance, PC) * hotel management activities (prepare primary documentation, clients contact, PC) * commercial agent activities (prepare primary documentation, chief of department, warehouse coordination, executive economist in the supplies/ sale departments in non-commercial enterprises, PC) * monitoring and management of products portfolio in your capacity of group product manager in big commercial units

****Faculty of Exact and Engineering Sciences**

*****Automatics and Applied Informatics**

*programming in the most modern and in demand languages, for the development of software, industrial and research applications * microcontroller systems coupled through Internet for distributed commands * mechatronic systems benefiting from advanced software and hardware technologies * multiprocessor systems * automated adjusted adaptive systems with microcontrollers * control systems, automated systems, computer networks and software systems design, development, operation and maintenance

*****Informatics**

*how to apply informatics in social life * identify the situations where the algorithmic information processing is needed * solve a problem step by step * identify the type of data necessary to solve a problem (input, output, temporary) * describe coherently a succession of operations through which input and output data are obtained * analyze the statement of a problem: identify the input and output data (specifying the type of data and the relationships among them) and establish the steps to solve the problem * represent algorithms in pseudocode * comply with the structured programming principles in the process of algorithm development * develop an algorithm to solve certain problems from the subject curriculum * choose the most efficient algorithm to solve a problem * identify the studied control structures in a program

*****Physics**

This faculty prepares you to work in a research institute.

****Faculty of Psychology and Educational Sciences**

*****Psychology**

*understand and use basic notions of psychology * elaborate a research project * interpersonal communication * elaborate certain projects relevant for today's topic in the field * present such projects during student circles, conferences, symposia * critical evaluation of problematic situations and possible solutions in psychology * evaluate the individual, the group, the organization, psychologically * psychological interventions

****Faculty of Journalism**

*****Journalism**

*learn and understand the main concepts of journalism * develop the capacity to produce a specific material in accordance with the different types of media - newspapers, Radio, TV, online * understand the impact of the journalistic message on the public * learn, understand and assume a professional behaviour consistent with the requirements of the activities specific to media institutions * learn and comply with the legislation and the ethical and deontological codes specific to the profession of journalist * the ability to work in a team * the development and strengthening of communication skills * ICT skills development - the capacity to use specific software designed for audio and video processing * the ability to allocate time efficiently

****Faculty of Arts**

***** Performing Arts (Acting)**

- The ability to master the basic vocabulary of acting, the knowledge and development of the body-spirit expressive qualities – the actor's "tool", the mastery of the basic acting techniques
- Master the fundamental theatrical language of acting from the essential branches of this profession: purification, relaxation – concentration, energy, the stage action in the stage space-time relationship, the phenomena of perception, memory and imagination, the relational field, the fictitious sensation and emotion
- Develop professional consciousness: deontological code, professional ethics and honor, discipline, rigor, responsibility, respect for the theatrical act; cultivating the pleasure of playing together.
- Artistic awareness and responsibility, the responsibility of belonging to a guild/craft, the awareness of the role theatre plays in a society

*****Cinematography, Photography and Media (Movie and TV Directing)**

*Use specific cinematographic language properly * Make capital out of the cinema and television specific visual language * Be able to produce scenic images and to assemble them into a composition * Apply strict, efficient, responsible work and punctuality strategies based on deontological principles, norms and values * Identify roles and responsibilities in a plurispecialized team and apply efficient relationship and work techniques within the team

****Faculty of Social, Humanistic and Natural Sciences**

*****Political Sciences**

- political analyst * public administration expert or consultant * political consultant in a political or non-governmental organization * public organization secretary * political scientist * Chief of Cabinet / Chief of Staff * researcher * publicist * editorialist * protocol manager * journalist * expert reviewer
- two scientific circles help develop students' analysis and research skills: The Scientific Circle of Political Analysis and Theory and the Scientific Circle "Politikron". Scientific papers are published in *Politikron* and in the *Annals of Political Sciences*.

- students practice their skills annually at the Romanian Parliament, at the district city halls, at the Bucharest City Hall, at various NGOs and political parties.

***History

- researcher * specialist in museography * archivist * archeologist * ethnologist
- you will learn about the values of universal culture and civilization, about national and European culture and you will develop your critical spirit.

***Geography

- tourism * environment * meteorology * water management * urbanism * regional development * rural development and others.
- you will be invited to be part of the “Simion Mehedinti” students’ scientific circle in order to develop your analytic and research skills and to organize your activity
- you will also be able to solve Geography-related problems in accordance with European Union’s provisions
- the “Populație-Habitat-Mediu” (“Population-Habitat-Environment”) Scientific Research Department will involve you in scientific research programs with practical application, one such example being “Satul românesc” (The Romanian Village), started in 2012 and which benefits from the activity of professors from other universities as well. You will then have the chance to publish your paper the *Analele Universitatii Hyperion*, edited in English.

***Letters and Foreign Languages – Romanian Language and Literature – One Modern Language and Literature (English, Japanese)

*research * understanding of the notion of communication in various languages * translation skills

**Faculty of Legal Sciences

***Law

*legal culture * the ability to interpret and apply legal norms in various social contexts * skills and competences in the legal area, the assimilation and correct and coherent use of specific language * the relationship between theoretical and practical competences and scientific research * comply with certain professional and ethic standards
